

## CLAYS AND METALS

1. **Finclbec Group** has launched the **Over** collection, a brand specialising in large sizes (80x320 cm and 120x260 cm). Contemporary design materials provided the inspiration for Titan, a wide range of surfaces with metallic and comenilious appeal. [www.finclbec.it](http://www.finclbec.it)

2. The **Costruire** collection from **Serenissima** is inspired by the material appeal and colour consists of clays and metals, as well as the soft look of freshly poured concrete. This innovative offering is based on the appeal of oxidised metals. [www.serenissima.ro.it](http://www.serenissima.ro.it)

## FLOWING COLOURS

The large size **Laminam** ceramic slabs (1610x3210 mm, in various thicknesses) are available in a wide range of finishes along with the latest stunning **FluidoSolido** collection with its vibrant, luminous colours. The new ceramic surfaces are created through a process of controlled expansion of pigment flows. [www.laminam.it](http://www.laminam.it)

## WARPS AND WEFTS

In the **Denim** collection from **Appiani**, a brand that began collaborating this year with FLID (the Lombardini22 group's branding and communication division), the essence of denim is reworked through three ceramic mosaic decorations (Isato, Ondulato, Striato). Different movements and colours are achieved by varying the inclinations, the relationship between warp and weft and the pattern of stripes and weaves. [www.appiani.it](http://www.appiani.it)
